- GPA : 3.48

2014 - 2020  
High School  
- Banharnjamsaiwittaya 1 School

## ACQUIRED SKILLS

### Skills

- Java
- C/C++/C#
- HTML/CSS
- MySQL
- Python
- Unity
- Microsoft office

### Language

- Thai (Native)
- English (Basic)

## PROJECT IN CLASS

### Unity Game Teteis

The game is written using the Pseudo Random Number theory on the Unity program, using the C# language in the entire backend and some parts of the frontend.

### Web application Find yourself

This website is a personality test for users, using multiple choice questions. It is written in Visual Studio Code using HTML and CSS. In this project, I am responsible for both the backend and frontend development.

### Web application Stocker

This website is designed to answer user questions related to data storage, product listings, and various product details in an online website format, using the Visual Studio Code, XAMPP, and phpMyAdmin programs. I am currently involved in the testing and deployment stages of the project.

### Application Time to proteen

This is an application that answers user questions about protein calculation per day, determining how much protein the user's body should receive each day, and the amount of protein received by the user at each meal. It uses Android Studio and the Java programming language. I am currently involved in the testing phase of the project.
