

Environmental Policy

The Navakij Insurance Public Company Limited (the “Company”)’s main business is providing services which do not directly affect the environment. However, the Company realizes the importance of using resources efficiently for sustainability in the environmental dimension. Therefore, the environmental policy has been established as follows:

1. The Company commits to complying with laws, regulations and agreements with customers, business partners or stakeholders related to the environment.

2. The Company focuses on using natural resources economically with maximum efficiency to prevent and reduce the environmental impact.

3. The Company creates consciousness, promotes knowledge and communicates environmental policy to employees to realize the importance of environmental protection.

4. The Company manages energy and other resources consumption economically and cost-effectively including effective waste management.

5. The Company improves work processes and methods including changing equipment used in operation to reduce the use of resources.

The Company reviews the policy regularly at least once a year or when there is a significant change.
