

The Navakij Insurance Public Company Limited
Report and financial statements
31 December 2023

Independent Auditor's Report

To the Shareholders of The Navakij Insurance Public Company Limited

Opinion

I have audited the accompanying financial statements, in which the equity method is applied, of The Navakij Insurance Public Company Limited, which comprise the statement of financial position as at 31 December 2023, and the related statements of income, comprehensive income, changes in equity and cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and have also audited the separate financial statements of The Navakij Insurance Public Company Limited for the same period.

In my opinion, the financial statements, in which the equity method is applied, referred to above present fairly, in all material respects, the financial position of The Navakij Insurance Public Company Limited as at 31 December 2023, its financial performance and cash flows for the year then ended and the separate financial statements of The Navakij Insurance Public Company Limited in accordance with Thai Financial Reporting Standards.

Basis for Opinion

I conducted my audit in accordance with Thai Standards on Auditing. My responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of my report. I am independent of the Company in accordance with the Code of Ethics for Professional Accountants including Independence Standards issued by the Federation of Accounting Professions (Code of Ethics for Professional Accountants) that are relevant to my audit of the financial statements, and I have fulfilled my other ethical responsibilities in accordance with the Code of Ethics for Professional Accountants. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Key Audit Matters

Key audit matters are those matters that, in my professional judgement, were of most significance in my audit of the financial statements of the current period. These matters were addressed in the context of my audit of the financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on these matters.

I have fulfilled the responsibilities described in the Auditor's Responsibilities for the Audit of the Financial Statements section of my report, including in relation to these matters. Accordingly, my audit included the performance of procedures designed to respond to my assessment of the risks of material misstatement of the financial statements. The results of my audit procedures, including the procedures performed to address the matters below, provide the basis for my audit opinion on the accompanying financial statements as a whole.

Key audit matters and how audit procedures respond to each matter are described below.

Insurance premium recognition

In 2023, the Company had revenue from insurance premiums amounting to Baht 3,823.8 million, which were derived from retail insured and had a large number of policies. The insurance premiums are collected from variety customers and insurance premiums amount rely on the processing of information technology system. I therefore focused on examining that insurance premium was correctly recognised as actually incurred.

I have assessed and tested the internal controls of information technology system and its internal controls with respect to underwriting, insurance premiums calculation and revenue recognition of insurance premiums by making enquiry of responsible executives, gaining an understanding and selecting representative samples to test the operation of the designed controls. In addition, I selected representative samples of insurance policies to assess whether revenue recognition was consistent with conditions specified in the insurance policies. I reviewed the insurance policies and endorsement transactions occurring during the accounting period, before and after period-end, which were recognised as revenues of the Company. In addition, I performed analytical procedures to compare insurance premiums recognised throughout the period and tested on sampling basis for accounting entries related to insurance premiums made through journal vouchers.

Insurance contract liabilities - claim reserves and outstanding claims

Insurance contract liabilities - claim reserves and outstanding claims account is significant to the financial statements. As at 31 December 2023, the Company had claim reserves and outstanding claims amounted to Baht 1,023.1 million (representing 26 percent of total liabilities). Claim reserves and outstanding claims normally includes both claims incurred and reported and claims incurred but not reported, which were calculated by the Company's management using actuarial techniques. The key assumptions applied were based on historical data and required the management to exercise substantial judgement in estimating such reserves, so I addressed the adequacy of claim reserves and outstanding claims as a key audit matter. In addition, such claim reserves and outstanding claims are directly relevant to claim reserves refundable from reinsurers which were also calculated by the Company's management using actuarial techniques. As at 31 December 2023, the Company had claim reserves refundable from reinsurers amounting to Baht 166.8 million.

I have assessed and tested the internal controls relevant to claims, loss adjustments, estimation of claim reserves and outstanding claims, and reinsurance by making enquiry of responsible executives regarding the criteria and assumptions used in the estimates made by the actuary. Performed random test reported claims and major claims file, and performed analytical procedures on the frequency of claims and average loss per claim. In addition, I reviewed the actuarial report to assess whether it was consistent with the reserve recognised, assessed the assumptions and methods used in the calculation of the reserves, test the data used by the actuary in calculating the reserves. Moreover, I also reviewed the estimates of insurance reserves refundable from reinsurers.

Other Information

Management is responsible for the other information. The other information comprise the information included in annual report of the Company, but does not include the financial statements and my auditor's report thereon. The annual report of the Company is expected to be made available to me after the date of this auditor's report.

My opinion on the financial statements does not cover the other information and I do not express any form of assurance conclusion thereon.

In connection with my audit of the financial statements, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or my knowledge obtained in the audit or otherwise appears to be materially misstated.

When I read the annual report of the Company, if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance for correction of the misstatement.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Thai Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Thai Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Thai Standards on Auditing, I exercise professional judgement and maintain professional skepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide those charged with governance with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, I determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

I am responsible for the audit resulting in this independent auditor's report.

The Navakij Insurance Public Company Limited

Notes to financial statements

For the year ended 31 December 2023

1. General information

The Navakij Insurance Public Company Limited ("the Company") is a public company incorporated and domiciled in Thailand. The Company is principally engaged in the non-life insurance and has 24 branches located in provinces. The registered office of the Company, which is the head office, is at 100/47-55, and 90/3-6, North Sathorn Road, Silom, Bangrak, Bangkok.

2. Basis for preparation of the financial statements

The financial statements have been prepared in accordance with Thai Financial Reporting Standards enunciated under the Accounting Professions Act B.E. 2547, and in accordance with Thai accounting practices related to insurance and the guidelines prescribed by the Office of Insurance Commission ("OIC"), and in accordance with the format of financial statements specified in the Notification of the OIC regarding criteria, procedures, conditions and terms for preparation and submission of financial statements of non-life insurance companies B.E. 2566 dated 8 February 2023.

The financial statements have been prepared on a historical cost basis except where otherwise disclosed in accounting policies.

The financial statements in Thai language are the official statutory financial statements of the Company. The financial statements in English language have been translated from Thai language financial statements.

2.1 Financial statements in which the equity method is applied

The Company prepares the financial statements, in which equity method is applied, by presented investment in associates under the equity method.

2.2 Separate financial statements

The separate financial statements have been prepared, which presented investments in associates under the cost method.

3. New financial reporting standards

3.1 Financial reporting standards that became effective in the current year

During the year, the Company has adopted the revised financial reporting standards and interpretations which are effective for fiscal years beginning on or after 1 January 2023. These financial reporting standards were aimed at alignment with the corresponding International Financial Reporting Standards with most of the changes directed towards clarifying accounting treatment and providing accounting guidance for users of the standards.

However, the Company applied the temporary exemption for the adoption of Thai Financial Reporting Standard 9 (TFRS 9): Financial Instruments and Thai Financial Reporting Standard 7 (TFRS 7): Disclosure of Information relating to Financial Instruments, which were revised in Thai Financial Reporting Standard 4: Insurance Contracts allowing the extension of the exemption period for the adoption of such TFRS 9 and TFRS 7 whereby the exemption period will end for the financial statements having the fiscal period starts on or after 1 January 2025 or when Thai Financial Reporting Standard 17: Insurances Contracts becomes effective.

The adoption of these financial reporting standards and temporary exemption does not have any significant impact on the Company's financial statements.

3.2 Financial reporting standards that will become effective for fiscal years beginning on or after 1 January 2024

The Federation of Accounting Professions issued a number of revised financial reporting standards, which are effective for fiscal years beginning on or after 1 January 2024. These financial reporting standards were aimed at alignment with the corresponding International Financial Reporting Standards with most of the changes directed towards clarifying accounting treatment and providing accounting guidance for users of the standards except TFRS 17 Insurance Contracts, which will supersede TFRS 4 Insurance Contracts, TFRS 9 Financial Instruments (Revised 2023) and TFRS 7 Financial Instruments: Disclosures, which will supersede Thai Accounting Guidance related to financial instruments and disclosures applicable to insurance business. Those standards will be effective for fiscal years beginning on or after 1 January 2025 and involved changes to key principles, summarised below.

TFRS 17 Insurance Contracts

This financial reporting standard establishes principles for the recognition, measurement, presentation and disclosure of insurance contracts. An entity shall recognise a group of insurance contracts it issues from the earliest of the beginning of the coverage period of the group of contracts, the date when the first payment from a policyholder in the group becomes due and for a group of onerous contracts, when the group becomes onerous. Upon initial recognition, this standard establishes the general model for the measurement whereby an entity shall measure a group of insurance contracts at the total of the fulfilment cash flows and the contractual service margin. The fulfilment cash flows represent the estimates of future cash flows, which arise from substantive rights and obligations that exist during the reporting period, and a risk adjustment for non-financial risk. The contractual service margin represents the unearned profit that the entity will recognise as it provides insurance contract services in the future and the release from risk.

However, the Company may adopt either the Variable Fee Approach or Premium Allocation Approach if contracts meet certain requirements under this standard. In addition, this standard requires the entity to present and disclose more information related both qualitative and quantitative information.

TFRS 9 Financial Instruments (Revised 2023) and TFRS 7 Financial Instruments: Disclosures

These standards will require an entity to reclassify and measure financial instruments to at fair value or amortised cost based on the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets, on the basis of the facts and circumstances in existence that exist at the initial date of application whereby an entity will classify as financial assets measured at amortised cost, financial assets measured at fair value through profit or loss and financial assets measured at fair value through other comprehensive income and there will be a change in the method of recognition profit and loss after initial recognition depends on the type of instrument and its classification.

However, the Company's management is in the process of assessment of the impact to financial statement for the year that such standards will be effective.

4. Summary of significant accounting policies

4.1 Product classification

The Company classified insurance and reinsurance contracts based on the nature of the insurance contract. Insurance contracts are those contracts where the insurer has accepted significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder. To determine whether a significant insurance risk has been accepted, the insurer compares the benefits payable after an insured event with the benefits payable if the insured event did not occur. If the criteria are not met, the Company classifies the insurance contract as an investment contract. Investment contracts have the legal form of insurance contracts and transfer financial risk to the insurer, but not significant insurance risk. Financial risks are specified as interest rate risk, exchange rate risk, or price risk.

The Company classifies contracts based on assessment of the significance of the insurance risk at inception of contract, on a contract by - contract basis. Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime. A contract classified as an investment contract at inception can be reclassified as an insurance contract after inception if the insurance risk becomes significant.

The Company classifies all insurance contracts as short-term insurance contracts, which means insurance contracts that have coverage periods of up to 1 year and no automatic renewal clause, as well as insurance contracts that have coverage periods of more than 1 year and the Company can terminate, increase or decrease insurance premiums or change any benefits of the insurance contracts throughout the coverage period.

4.2 Revenue recognition

(a) Gross premium written

Gross premium written consists of direct premium and reinsurance premium less premium of canceled policies and premiums refunded to policyholders.

Direct premium is recognised as income on the date the insurance policy comes into effect at the amount specify in the policies.

Reinsurance premium is recognised as income on the date the insurance policy comes into effect, or when the reinsurer places the statement of accounts with the Company.

(b) Fee and commission income

Fee and commission income from ceded premium are recognised as income when incurred.

- (c) Interest income and dividends received from investments

Interest income

Interest income is calculated using the effective interest method and recognised on an accrual basis. The effective interest rate is applied to the gross carrying amount of a financial asset, unless the financial assets subsequently become credit-impaired when it is applied to the net carrying amount of the financial asset (net of the expected credit loss allowance).

Dividends received

Dividends are recognised as revenue when the right to receive the dividends is established.

- (d) Profit (loss) on investments

Profit (loss) on investments consist of profit (loss) on disposal of investments and impairments of investments and present net of related expenses. Profit (loss) on investments are recognised as revenues or expenses on the transaction date.

- (e) Fair value gain (loss)

Fair value gain (loss) consist of gain (loss) from the change in fair value of financial instrument.

The Company recognises in profit or loss on the fair value measurement date.

4.3 Expenses recognition

- (a) Premiums ceded to reinsurer

Premiums ceded to reinsurer is recognised as expenses when the insurance risk is transferred to another reinsurer at amount per policy.

- (b) Claim and loss adjustment expense

Claim and loss adjustment expense consist of claim and loss adjustment expenses of direct insurance and reinsurance of both reported and not reported, and include the amounts of claim, related expenses, and claim adjustments of current and prior period incurred during the year, less residual value and other recoveries (if any), and claim recovery from reinsurers.

Claims recovery from reinsurer is recognised when claim and loss adjustment expenses are recorded as the condition in the relevant reinsurance contract.

Claim and loss adjustment expenses of direct insurance are recognised upon the receipt of the claim advice from the insured, based on the claim notified by the insured and estimates made by the Company's management. The maximum value of claim estimated is not however, to exceed the sum-insured under the relevant policy.

Claim and loss adjustment expenses of reinsurance are recognised when the reinsurer places the loss advice with the Company.

(c) Commission and brokerage expenses

Commission and brokerage expenses are expended when incurred.

(d) Other underwriting expenses

Other underwriting expenses are other insurance expenses for both direct and indirect expenses, including contributions, which are recognised as expenses on accrual basis.

(e) Operating expenses

Operating expenses are operating expenses, not related to underwriting and claim, which are recognised as expenses on accrual basis.

(f) Finance cost

Interest expense from financial liabilities presented at amortised cost is calculated using the effective interest method and recognised on an accrual basis.

4.4 Cash and cash equivalents

Cash and cash equivalents consist of cash in hand and at banks, and all highly liquid investments with an original maturity of three months or less and not subject to withdrawal restrictions.

4.5 Premium receivables and allowance for doubtful accounts

Premium receivables from direct insurance are stated at net realisable value. The Company set up an allowance for doubtful accounts based on the estimated loss that may incur in collection of the premium receivables, on the basis of collection experiences, analysis of debtor aging and a review of current status of the premium due as at the end of reporting period.

Increase (decrease) in allowance for doubtful accounts is recorded as expenses during the year.

4.6 Reinsurance assets

Reinsurance assets consist of insurance reserve refundable from reinsurers which is estimated based on the related reinsurance contract of loss reserves and outstanding claim in accordance with the law regarding insurance reserve calculation, and unearned premium reserves.

The Company set up an allowance for doubtful accounts of reinsurance assets when had indicator for impairment, based on loss that may be incurred due to uncollectible, taking into account collection experience, aged of balance, and the status of receivables from reinsurers as at the end of the reporting periods.

Increase (decrease) in allowance for doubtful accounts is recorded as expenses during the year.

4.7 Reinsurance receivables and due to reinsurers

- (a) Reinsurance receivables are stated at the outstanding balance of amount due from reinsurers and amounts deposit on reinsurance.

Amounts due from reinsurers consist of inward premium receivable, accrued fee and commission income, claim and various other items receivable from reinsurers, less allowance for doubtful accounts. The Company set up an allowance for doubtful accounts for loss that may be incurred due to inability to make collection, taking into account collection experience and the status of receivables from reinsurers as at the end of the reporting period.

- (b) Due to reinsurers are stated at the outstanding balance of amount due to reinsurers and amounts withheld on reinsurance.

Amounts due to reinsurers consist of reinsurance premiums, and other items payable to reinsurers, excluding loss reserve from reinsurance.

The Company presents net of reinsurance to the same entity (reinsurance receivables or amounts due to reinsurers) when the following criteria for offsetting are met.

- (1) The Company has a legal right to offset amounts presented in the statements of financial position, and
- (2) The Company intends to receive or pay the net amount recognised in the statements of financial position, or to realise the asset at the same time as it pays the liability.

4.8 Financial instruments

- (a) Investments in securities

Trading investments are stated at fair value. Change in the fair value of these investments are recorded in profit or loss. Investments are classified as trading investments if the Company intends to sell them in the near future.

Available-for-sale investments are stated at fair value. Change in the fair value of these investments are recorded in other comprehensive income.

Investments in debt instruments, both due within one year and expected to be held to maturity, are recorded at amortised cost. The premium/discount on debt instruments is amortised by the effective rate method with the amortised/accreted amount presented as an adjustment to the interest income.

Investments in non-marketable equity instruments (non-listed company) are stated at fair value and classified as available-for-sale investments. Change in the fair value of these investments are recorded in other comprehensive income.

The fair value of marketable securities is based on the latest bid price of the last working day of the period. The fair value of debt instruments is determined based on yield rate quoted by the Thai Bond Market Association. The fair value of unit trust is determined from its net asset value. The fair value of non-marketable equity instruments is determined using generally accepted pricing model or approximated to their net book value if the fair value cannot be reliably estimated.

The weighted average method is used for computation of the cost of investments.

On disposal of an investment, the difference between net disposal proceeds and the carrying amount of the investment is recognised in the statements of income.

In the event the Company reclassifies investments from one type to another, such investments will be readjusted to their fair value as at the reclassification date. The difference between the carrying amount of the investments and the fair value on the date of reclassification are recorded in statements of income or recorded as revaluation surplus or deficit in other components of equity, depending on the type of investment that is reclassified.

At end of reporting period, available-for-sale investments and investments in held-to-maturity of debt instruments are stated net of an allowance for impairment or an allowance for expected credit loss (if any).

(b) Loans and interest receivables

Loans and interest receivables are stated at amortised cost and net of allowance for expected credit loss (if any).

(c) Classification and measurement of financial liabilities

At initial recognition the Company's financial liabilities are recognised at fair value net of transaction costs and classified as liabilities to be subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in statement of income when the liabilities are derecognised as well as through the EIR amortisation process.

(d) Derecognition of financial instruments

A financial asset is primarily derecognised when the rights to receive cash flows from the asset have expired or have been transferred and either the Company has transferred substantially all the risks and rewards of the asset, or the Company has transferred control of the asset.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

(e) Impairment of financial assets

The Company recognises expected credit loss on its financial assets measured at amortised cost and financial assets that are debt instruments which are classified as available-for-sale investments using general approach in accordance with Accounting Guidance related to financial instruments. The Company recognises an allowance for expected credit loss at the amount equal to the lifetime expected credit loss when there has been a significant increase in credit risk since initial recognition but that are not credit-impaired or that are impaired. However, if there has not been a significant increase in credit risk since initial recognition, the Company recognised allowance for expected credit loss at the amount equal to the expected credit loss in the next 12 months.

At every reporting date, the Company assesses whether there has been a significant increase in the credit risk of financial assets since initial recognition by considering internal and external credit ratings of the counterparties and overdue status such as over 30 days past due, and if the debtor is more than 90 days past due it is assessed to be credit-impaired.

Expected credit loss is calculated using probability of default (PD), loss given default (LGD) and exposure at default (EAD). The Company assessed PD and LGD by considering the historical loss experience adjusted with current observable data and reasonable and supportable forward-looking information. The Company determines EAD using gross carrying value at the reporting date.

Loss on impairment of financial assets that are equity instruments and unit trusts which are classified as available-for-sale investments is recognised immediately in profit or loss when there is objective evidence of impairment, determined on the basis of evidence that indicates the cost of investments may not be recovered and there is a significant or prolonged decline in fair value of investments to below its costs.

For other financial assets or contract assets that do not contain a significant financing component, the Company applies a simplified approach to determine the lifetime expected credit loss. It is based on its historical credit loss experience and adjusted for forward-looking factors specific to the debtors and the economic environment.

Increase (decrease) in allowance for expected credit loss and allowance for impairment is recognised as expenses during the year in statement of income. The Company has a policy to write off any financial assets when it is believed that they will not be collected from the debtor.

4.9 Investments in associates

Investments in associates, as presented in the financial statements in which the equity method is applied, are initially recorded at cost and are subsequently adjusted to reflect the proportionate share of the associates's net income or loss and deducted by dividend income.

Investments in associates, as presented in the separate financial statements, are stated at cost net of allowance for impairment (if any). Loss on impairment is recorded as expenses in the statement of income.

4.10 Property, buildings and equipment /Depreciation

Land is stated at cost. Buildings and equipment are stated at cost less accumulated depreciation and allowance for impairment of assets (if any).

Depreciation of buildings and equipment is calculated by reference to their costs on a straight-line basis over the following estimated useful lives.

Buildings	-	20, 40	years
Condominium units	-	20, 40	years
Buildings improvement	-	5, 10, 20	years
Office furniture, fixture and equipment	-	5	years
Motor vehicles	-	5	years

Depreciation is included in determining income.

No depreciation is provided on land and assets under installation.

An item of land, buildings and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on disposal of an asset (the difference between the net compensation from disposal of an assets and the carrying amounts) is included in statement of income when the asset is derecognised.

4.11 Intangible assets and amortisation

Intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment loss (if any).

Intangible assets with finite life is amortised on the straight-line basis over the economic useful life and tested for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method of such intangible asset are reviewed at least at each financial year end. The amortisation expense is charged to statement of income.

The useful life of intangible assets with finite useful life which is computer software is 2, 5 and 10 years.

No amortisation is provided on computer software under development.

4.12 Leases

At inception of contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Company applied a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. At the commencement date of the lease (i.e. the date the underlying asset is available for use), the Company recognises right-of-use assets representing the right to use underlying assets and lease liabilities based on lease payments.

Right-of-use assets

Right-of-use assets are measured at cost, less accumulated depreciation, any accumulated impairment loss, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities initially recognised, initial direct costs incurred, and lease payments made at or before the commencement date of the lease less any lease incentives received.

Depreciation of right-of-use assets are calculated by reference to their costs, on the straight-line basis over the shorter of their estimated useful lives and the lease term.

Lease buildings	- 3 - 6	years
Office equipment	- 4	years
Motor vehicles	- 3 - 5	years
Computer	- 5	years
Computer software	- 10	years

Lease liabilities

Lease liabilities are measured at the present value of the lease payments to be made over the lease term. The lease payments include fixed payments and amounts expected to be payable under residual value guarantees.

The Company discounted the present value of the lease payments by the Company's incremental borrowing rate. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a change in the lease term, a change in the lease payments or a change in the assessment of an option to purchase the underlying asset.

Short-term leases and leases of low-value assets

A lease that has a lease term less than or equal to 12 months from commencement date or a lease of low-value assets is recognised as expenses on a straight-line basis over the lease term.

4.13 Impairment of non-financial assets

At the end of each reporting period, the Company performs impairment reviews in respect of the investments in associates, property, building and equipment, right-of-use asset or other intangible assets whenever events or changes in circumstances indicate that an asset may be impaired. An impairment loss is recognised when the recoverable amount of an asset, which is the higher of the asset's fair value less costs to sell and its value in use, is less than the carrying amount. In determining value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. These calculations are corroborated by a valuation model that, based on information available, reflects the amount that the Company could obtain from the disposal of the asset in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal.

An impairment loss is recognised in statement of income.

4.14 Insurance contract liabilities

Insurance contract liabilities consist of claim reserve and outstanding claims and premium reserves.

(a) Claim reserve and outstanding claims

Outstanding claims are recorded at the amount to be actually paid. Loss reserves are provided upon receipt of claim advices from the insured based on the claims notified by the insured and estimates made by the Company's management. The maximum value of claims estimate is however, not to exceed the sum-insured under the relevant policy.

Outstanding claim provision are calculated using an actuarial method based on a best estimate of claims which are expected to be paid in respect of loss occurring before or as at the end of the reporting periods for both reported and not reported loss including loss adjustment expense, after deducting salvage values and other recoverable values. The different of the calculated outstanding claim provision which are higher than the loss reserve that recognised into financial statement, are recognised as reserves for claims incurred but not yet reported (IBNR).

(b) Premium reserves

Premium reserves consist of unearned premium reserve and unexpired risk reserve.

(a) Unearned premium reserve

Unearned premium reserve is calculated based on direct premium before deducting premium ceded as follows:

Transportation (cargo), travelling accident with coverage periods of not over six-months	- 100% of premium as from the date policy is effective, throughout the period of insurance coverage
--	---

Others	- Daily average basis by the period of coverage under policy
--------	--

Outward unearned premium reserve is calculated based on reinsurance premium ceded, as the same method as direct insurance, and recognised for the policy that transfer insurance risk to reinsurer.

The increase or decrease in unearned premium reserves from prior year is to be recognised in statement of income

(b) Unexpired risk reserve

Unexpired risk reserve is the reserve for the claims and related expenses that may be incurred in respect of in-force policies. Unexpired risk reserve is set aside using an actuarial method, at the best estimate of the claims that are expected to be incurred during the remaining period of coverage, based on historical claims data.

As at the end of reporting period, the Company compares the amounts of unexpired risk reserve with unearned premium reserve, and if unexpired risk reserve is higher than unearned premium reserve, the difference is recognised and the unexpired risk reserve is therefore presented in the financial statements.

4.15 Employee benefits

(a) Short-term employee benefits

Salaries, wages, bonuses and contributions to the social security fund are recognised as expenses when incurred.

(b) Post-employment benefits

Defined contribution plans

The Company and its employees have jointly established a provident fund. The fund is monthly contributed by employees and by the Company. The fund's assets are held in a separate trust fund and the Company's contributions are recognised as expenses when incurred.

Defined benefit plans

The Company has obligations in respect of the severance payments it must make to employees upon retirement under labor law. The Company treats these severance payment obligations as a defined benefit plan.

The obligation under the defined benefit plan is determined by an independent actuary based on actuarial techniques, using the projected unit credit method.

Actuarial gain and loss arising from post-employment benefits are recognised immediately in other comprehensive income.

4.16 Provisions

Provisions are recognised when the Company has a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

4.17 Foreign currencies

The financial statements are presented in Baht, which is also the Company's functional currency.

Transactions in foreign currencies are translated into Baht at the exchange rates ruling at the date of transaction. Monetary assets and liabilities denominated in foreign currencies are translated into Baht at the exchange rates ruling at the end of reporting period.

Gain and loss on exchange are included in determining income.

4.18 Income tax

Income tax expense represents the sum of corporate income tax currently payable and deferred tax.

Current tax

Current income tax is provided in the accounts at the amount expected to be paid to the taxation authorities, based on taxable profits determined in accordance with tax legislation.

Deferred tax

Deferred income tax is provided on temporary differences between the tax bases of assets and liabilities and their carrying amounts at the end of each reporting period, using the tax rates enacted at the end of the reporting period.

The Company recognises deferred tax liabilities for all taxable temporary differences while it recognises deferred tax assets for all deductible temporary differences to the extent that it is probable that future taxable profit will be available against which such deductible temporary differences can be utilised.

At the end of each reporting period, the Company reviews and reduces the carrying amount of deferred tax assets to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

The Company records deferred tax directly to equity if the tax relates to items that are recorded directly to equity.

4.19 Related party transactions

Related parties comprise individuals or enterprises that control, or are controlled by, the Company, whether directly or indirectly, or which are under common control with the Company.

They also include associated companies, individuals or enterprises which directly or indirectly own a voting interest in the Company that gives them significant influence over the Company, key management personnel, directors and officers with authority in the planning and direction of the Company's operations.

4.20 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between buyer and seller (market participants) at the measurement date. The Company applies a quoted market price in an active market to measure their assets and liabilities except in case of no active market of an identical asset or liability or when a quoted market price is not available, the Company measures fair value using valuation technique that are appropriate in the circumstances and maximises the use of relevant observable inputs related to assets and liabilities that are required to be measured at fair value.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy into three levels based on categorise of input to be used in fair value measurement as follows:

Level 1 - Use of quoted market prices in an observable active market for such assets or liabilities

Level 2 - Use of other observable inputs for such assets or liabilities, whether directly or indirectly

Level 3 - Use of unobservable inputs such as estimates of future cash flows

At the end of each reporting period, the Company determines whether transfers have occurred between levels within the fair value hierarchy for assets and liabilities held at the end of the reporting period that are measured at fair value on a recurring basis.

5. Significant accounting judgements and estimates

The preparation of financial statements in conformity with Thai Financial Reporting Standards at times requires management to make subjective judgements and estimates regarding matters that are inherently uncertain. These judgements and estimates affect reported amounts and disclosures and actual results could differ from these estimates. Significant judgements and estimates are as follows:

5.1 Allowance for doubtful accounts on premium receivables and amounts due from reinsurers

In determining an allowance for doubtful accounts on premium receivables and amounts due from reinsurers, the management needs to make judgement and estimates based upon, among other things, past collection history, aging profile of outstanding debts and the prevailing economic condition.

5.2 Allowance for impairment on equity instruments and unit trusts classified as available-for-sale investments and measured at FVOCI

The Company treats equity instruments and unit trusts classified as available-for-sale investments and measured at FVOCI as impaired when there has been a significant or prolonged decline in the fair value or where other objective evidence of impairment exists. The determination of what is "significant" or "prolonged" requires judgment of the management.

5.3 Allowances for expected credit loss of financial assets

The management is required to use judgement in estimating allowance for expected credit loss of financial assets. The Company's calculation of allowance for expected credit loss depends on the criteria used for assessment of a significant increase in credit risk, the debtors status analysis and the probability of debt collection. This estimation has various relevant factors; therefore, the actual results may differ from estimates.

5.4 Land, buildings and equipment/ Depreciation

In determining depreciation of buildings and equipment, the management is required to make estimates of the useful lives and residual values of the Company's buildings and equipment and to review estimate useful lives and residual values when there are any changes.

In addition, the management is required to review land, buildings and equipment for impairment on a periodical basis and record impairment loss when it is determined that their recoverable amount is lower than the carrying amount. This requires judgement regarding forecast of future revenues and expenses relating to the assets subject to the review.

5.5 Deferred tax assets

Deferred tax assets are recognised for deductible temporary differences to the extent that it is probable that taxable profit will be available against which the temporary differences can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of estimate future taxable profit.

5.6 Loss reserves and outstanding claims

At the end of each reporting period, the Company has to estimate loss reserves and outstanding claims taking into account two factors. These are claims incurred and reported, and the claims incurred but not yet reported (IBNR). The ultimate loss of outstanding claims is established using a range of standard actuarial claims projection techniques. The main assumptions underlying these techniques relate to various factors. To perform the calculation, it is necessary to perform analysis based on the type of insurance and to use the services of an actuary expertise, experience, and an understanding of the insurance business and the Company's products. Nevertheless, such estimates are forecasts of future outcomes, and actual results could differ.

5.7 Unexpired risk reserve

Unexpired risk reserve is calculated using an actuarial method, based on a best estimate of the claims and related expenses expected to incur over the remaining term of the insurance. Estimating the reserve requires the management to exercise judgement, with reference to historical data and the best estimates available at the time.

5.8 Post-employment benefits under defined benefit plans

The obligation under the defined benefit plan is determined based on actuarial techniques. Such determination is made based on various assumptions, including discount rate, future salary increase rate, mortality rate and staff turnover rate.

5.9 Determining the lease term and estimating the incremental borrowing rate of leases

In determining the lease term, the management is required to exercise judgement in assessing whether the Company is reasonably certain to exercise the option to extend or terminate the lease considering all relevant facts and circumstances that create an economic incentive for the Company to exercise either the extension or termination option.

The Company cannot readily determine the interest rate implicit in the lease, therefore, the management is required to exercise judgement in estimating its incremental borrowing rate to discount lease liabilities. The incremental borrowing rate is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment.

5.10 Allowance for impairment of non-financial assets

In determining allowance for impairment of a non-financial assets, the management is required to exercise judgements regarding determination of the recoverable amount of the asset, both fair value less costs of disposal calculation and value in use calculation. The calculation is based on a discounted cash flow model which requires various assumptions such as the discount rate used for the model, the expected future cash-inflows and the growth rate used for extrapolation purposes. Change in assumptions could affect the value in use calculation.

5.11 Litigation

The Company has contingent liabilities as a result of litigation. The Company's management has used judgement to assess of the results of the litigation and believes that loss incurred will not exceed the recorded amounts as at the end of reporting period.

5.12 Recognition and derecognition of assets and liabilities

In considering whether to recognise or to derecognise assets or liabilities, the management is required to make judgement on whether significant risk and rewards of those assets or liabilities have been transferred, based on their best knowledge of the current events and arrangements.

5.13 Fair value of financial instruments

In determining the fair value of financial instruments that are not actively traded and for which quoted market prices are not readily available, the management exercise judgement, using a variety of valuation techniques and models. The input to these models is taken from observable markets, and includes consideration of credit risk, liquidity, correlation and longer-term volatility of financial instruments. Change in assumptions about these factors could affect the fair value and disclosures of fair value hierarchy.

6. Cash and cash equivalents

	(Unit: Baht)	
	2023	2022
Cash on hand	255,000	257,000
Deposits at banks with no fixed maturity date	187,735,263	263,239,535
Deposits at bank with fixed maturity date	-	30,000,000
Total cash and cash equivalents	187,990,263	293,496,535
Less: Allowance for expected credit loss	(25,492)	(29,842)
Total cash and cash equivalents, net	187,964,771	293,466,693

As at 31 December 2023, current deposits, saving deposits and fixed deposits carried interest between 0.15 and 0.55 percent per annum (2022: between 0.10 and 1.80 percent per annum).

7. Premium receivables

As at 31 December 2023 and 2022, the balances of premium receivables from direct insurance are classified by aging from the maturity date under the stipulated law of the premium collection as follows:

	(Unit: Baht)	
	2023	2022
Not yet due	480,713,294	486,073,041
Not over 30 days	68,106,938	54,291,619
Over 31 days to 60 days	33,183,987	10,584,184
Over 61 days to 90 days	10,738,638	2,337,161
Over 91 days to 1 year	16,131,614	5,711,585
Over 1 year	914,835	444,360
Total premium receivables	609,789,306	559,441,950
Less: Allowance for doubtful accounts	(923,954)	(1,632,229)
Total premium receivables, net	608,865,352	557,809,721

For premium receivables due from agents and brokers, the Company has stipulated the collection guideline in accordance with the law of the premium collection. For overdue premium receivables, the Company has the legal process with such agents and brokers.

8. Reinsurance assets

	(Unit: Baht)	
	2023	2022
Insurance reserve refundable from reinsurers		
Claims reserve	166,831,762	235,682,956
Unearned premium reserve	<u>413,422,847</u>	<u>427,779,211</u>
Reinsurance assets	<u>580,254,609</u>	<u>663,462,167</u>

9. Reinsurance receivables

	(Unit: Baht)	
	2023	2022
Amounts deposit on reinsurance	78,124	96,677
Amounts due from reinsurers	<u>234,908,672</u>	<u>395,877,122</u>
Total	<u>234,986,796</u>	<u>395,973,799</u>

As at 31 December 2023 and 2022, the balances of amounts due from reinsurers are classified by aging as follows:

	(Unit: Baht)	
	2023	2022
Not yet due	163,466,161	377,928,645
Not over 1 year	70,800,081	14,753,507
Over 1 year to 2 years	453,615	1,988,697
Over 2 years	<u>188,815</u>	<u>1,206,273</u>
Total amounts due from reinsurers	<u>234,908,672</u>	<u>395,877,122</u>

Total	<u>3,058,558,266</u>	<u>(663,462,167)</u>	<u>2,395,096,099</u>

During the years 2023 and 2022, the management of the Company entered into reinsurance agreements in order to mitigate insurance risk. Although positions are managed on a net basis by management, insurance contract liabilities disclosures have been made on both a gross and net basis in order to provide a comprehensive set of disclosures.

18.1 Claim reserves and outstanding claims

(Unit: Baht)

	For the years ended 31 December	
	2023	2022
Beginning balance	1,028,891,922	1,019,959,239
Claim expenses for the year	2,407,989,723	2,372,136,274
Change in claim reserves and outstanding claims from the prior year	(122,747,680)	(100,333,440)
Change in assumption for calculating claim reserves	(37,773,696)	(119,380,848)
Claim paid during the year	(2,253,297,263)	(2,143,489,303)
Ending balance	<u>1,023,063,006</u>	<u>1,028,891,922</u>

As at 31 December 2023, the Company has claim reserves and outstanding claims under reinsurance contracts at Baht 14.4 million (2022: Baht 10.5 million).

18.2 Claim development table

18.3 Methodology and assumption

The methodology and assumptions adopted for the gross and net valuations of insurance contract liabilities (claim reserves and outstanding claims) as at 31 December 2023 and 2022 are presented as follows:

(a) Outstanding claims provision

1. Direct and inward facultative business

The Company used 3 actuarial methods as follows:

1.1 Chain Ladder method based on both claims paid and claims incurred

1.2 Bornhuetter-Ferguson method (“BF”) based on both claims paid and claims incurred

1.3 Expected Loss Ratio method (“ELR”)

The Company mostly relies on the Chain Ladder method on claims incurred to derive the best estimate of claims liability. The BF and ELR methods are also used where appropriate. Loss Development Factors (“LDF”) are selected based on a range of criteria, which include the pattern of historical claims payments and claims incurred. In most instances, the loss development factors selected are based on various average loss development factors for each development year. The Company also takes into consideration whether averages may not be appropriate, for reasons such as the average not reflecting the Company’s operational changes, the average being inappropriate due to distortion by large claims, or the average being contrary to a trend of the historical ratios.

Both qualitative and quantitative factors are taken by the Company into consideration in the selection of LDF to produce claim reserves that appropriately reflect the Company’s future claims liability as at the valuation date.

2. Inward treaty business

The Company uses a basic approach in estimating claims reserves provision for inward treaty business. This approach assumes that the claims reserves requirements for the inward treaty business would be proportionally similar to those of the direct and inward facultative business. The Company therefore use the percentage of gross outstanding case reserves to apply with inward treaty contracts.

(b) Estimation of Unallocated Loss Adjustment Expenses reserve (ULAE)

In determining the ULAE, the Company used total expenses to estimate the claim expenses. ULAE is calculated from the ratio of ULAE to the average of paid loss and reported loss which is based on the assumption that half of a claim's ULAE is expended when a loss is reported, and half when it is paid.

The ULAE ratios are computed for motor and non-motor classes separately and are applied onto the best estimate of gross claim liability (excluding flood claims in 2011) to obtain the ULAE reserves for claims liability.

ULAE reserve is computed as the sum of the ULAE ratio multiplied by half of the case reserve and outstanding claims, plus the ULAE ratio multiplied by the incurred but not reported (IBNR) reserve.

(c) Economic assumptions

The Company has not discounted for future investment earnings, and has not explicitly inflation adjusted claim amounts payable in the future. However, the Company has implicitly allowed for future claims inflation to the extent that this is evident in past claims development.

(d) Other assumptions

The Company has assumed that claims development patterns are generally consistent and stable over the years and also assumed that the past inflation pattern will continue into future projected years. For claims prior to accident year 2004, the Company has reached their ultimate claim so there would be no IBNR from these claims.

18.4 Unearned premium reserves

	(Unit: Baht)	
	For the years ended 31 December	
	2023	2022
Beginning balance	2,029,666,344	1,818,326,935
Premium written for the year	3,823,848,543	3,666,681,691
Premium earned for the current year	<u>(3,737,820,829)</u>	<u>(3,455,342,282)</u>
Ending balance	<u>2,115,694,058</u>	<u>2,029,666,344</u>

19. Due to reinsurers

	(Unit: Baht)	
	2023	2022
Amounts withheld on reinsurance	154,114,955	257,593,579
Amounts due to reinsurers	<u>334,838,763</u>	<u>407,630,395</u>
Total due to reinsurers	<u>488,953,718</u>	<u>665,223,974</u>

20. Employee benefit obligations

The movement of provision for employee benefit obligations for the years ended

31

December 2023 and 2022 was as follows:

	(Unit: Baht)	
	For the years ended 31 December	
	2023	2022
Employee benefit obligations at beginning of year	67,423,858	67,415,580
Included in statement of income:		
Current service cost	9,684,778	9,477,156
Interest cost	1,852,023	1,356,092
Total items included in statement of income	11,536,801	10,833,248
Included in statement of comprehensive income:		
Actuarial loss (gain) arising from		
Demographic assumption change	383,664	(667,835)
Financial assumption change	1,275,169	(1,752,276)
Experience adjustment	(1,074,552)	(465,259)
Total items included in statement of comprehensive income	584,281	(2,885,370)
Benefit paid during the year	<u>(5,385,134)</u>	<u>(7,939,600)</u>
Employee benefit obligations at end of year	<u>74,159,806</u>	<u>67,423,858</u>

As at 31 December 2023, the weighted average duration of the liabilities for long-term employee benefit is 11 years, and the Company expected to pay Baht 10.4 million of long-term employee benefits during the next year (2022: 11 years and Baht 5.9 million, respectively).

Significant actuarial assumptions are summarised below:

	(Unit: % per annum)	
	2023	2022
Discount rate	2.7	2.8
Salary increase rate	3.4 - 6.0	3.3 - 5.8
Staff turnover rate	0.0 - 16.0	0.0 - 16.0

The result of sensitivity analysis for significant assumptions that affect the present value of the long-term employee benefit obligation as at 31 December 2023 and 2022 are summarised below:

	2023			
	Employee benefit obligations increase		Employee benefit obligations increase	
	Increase in assumption	(decrease)	Decrease in assumption	(decrease)
	(%)	(Baht)	(%)	(Baht)
Discount rate	1.0	(4,838,622)	1.0	5,521,080
Salary increase rate	1.0	5,762,108	1.0	(5,150,927)
Staff turnover rates	10.0 ⁽¹⁾	(2,559,166)	10.0 ⁽¹⁾	2,749,305

⁽¹⁾ 10% of the turnover rate used as assumption.

	2022			
	Employee benefit obligations increase		Employee benefit obligations increase	
	Increase in assumption	(decrease)	Decrease in assumption	(decrease)
	(%)	(Baht)	(%)	(Baht)
Discount rate	1.0	(4,495,141)	1.0	5,128,437
Salary increase rate	1.0	5,356,285	1.0	(4,786,474)
Staff turnover rates	10.0 ⁽¹⁾	(2,403,444)	10.0 ⁽¹⁾	2,586,210

⁽¹⁾ 10% of the turnover rate used as assumption.

21. Share capital

On 20 April 2023, the 2023 Annual General Meeting of shareholders approved an increase of the Company's registered share capital from Baht 360 million to be Baht 370 million (37 million shares of Baht 10 each) by newly issues the ordinary shares in amount of 1 million shares with the par value at Baht 10 per share to support the stock dividend payment, and approved to allocate indivisible share remaining after such allocated the stock dividend to the Navakij Insurance Provident Fund. The Company registered the increase of share capital with the Ministry of Commerce on 2 June 2023.

On 26 April 2022, the 2022 Annual General Meeting of shareholders approved an increase of the Company's registered share capital from Baht 350 million to be Baht 360 million (36 million shares of Baht 10 each) by newly issues the ordinary shares in amount of 1 million shares with the par value at Baht 10 per share to support the stock dividend payment, and approved to allocate indivisible share remaining after such allocated the stock dividend to the Navakij Insurance Provident Fund. The Company registered the increase of share capital with the Ministry of Commerce on 7 June 2022.

22. Statutory reserve

Pursuant to Section 116 of the Public Limited Companies Act B.E. 2535, the Company is required to set aside a statutory reserve at least 5 percent of its net profit, until the reserve reaches 10 percent of the registered capital. The statutory reserve is not available for dividend distribution.

During the year 2023 and 2022, the Company set aside a statutory reserve of its net profit amounting to Baht 1 million each. As at 31 December 2023, the Company has statutory reserve totalling Baht 37 million and Baht 36 million, respectively.

23. Segment information

Operating segment information is reported in a manner consistent with the internal reports that are regularly reviewed by the Chief Operating Decision Maker in order to make decisions about the allocation of resources to the segment and assess its performance. The Chief Operating Decision Maker has been identified as Chairman of the Executive Board.

For management purposes, the Company is organised into business units based on its products, which consisted of Fire, Marine and transportation, Motor, and Miscellaneous insurance.

The Chief Operating Decision Maker monitors the operating results of the business units separately for the purpose of making decisions about resource allocation and assessing performance. Segment performance is measured based on operating profit or loss, total assets and total liabilities, and on a basis consistent with that used to measure operating profit or loss, total assets and total liabilities in the financial statements.

The basis of accounting for any transactions between reportable segments is consistent with that for third party transactions.

Segment assets and liabilities of the Company's operating segments as at 31 December 2023 and 2022 are as follows:

Geographic information

The Company is operated its business in Thailand only, as a result, all of the revenues and assets as reflected in these financial statements pertain to the aforementioned geographical reportable.

Major customers' information

During the year ended 31 December 2023, the Company had gross premium written from 310 major customer amounting to Baht 310 million (2022: 1 major customers amounting to Baht 367 million).

24. Investments income

During the years ended 31 December 2023 and 2022, the Company has investment income as follows:

	(Unit: Baht)	
	For the years ended 31 December	
	2023	2022
Interest income from debt securities	41,691,695	20,869,367
Dividends received from equity securities	58,080,358	59,854,272
Investments income	<u>99,772,053</u>	<u>80,723,639</u>

25. Operating expenses

Bad debts and doubtful accounts (reversal)	(758,622)	1,152,678
Finance costs	1,602,330	1,907,055
Expected credit loss	18,951,904	5,638,385
Other operating expenses	55,226,590	54,554,916
Total	<u>3,111,357,482</u>	<u>2,889,627,778</u>

28. Provident fund

The Company and its employees have jointly established a provident fund in accordance with the Provident Fund Act B.E. 2530. Both employees and the Company contribute to the fund monthly at the rate of 5 percent of basic salary. The fund, which is managed by Tisco Asset Management Public Company Limited, will be paid to employees upon termination in accordance with the fund rules. During the year 2023, the Company contributed Baht 9.6 million (2022: Baht 9.5 million) to the fund.

29. Contribution to the General Insurance Fund

	(Unit: Baht)	
	For the years ended 31 December	
	2023	2022
Accumulated contribution at the beginning of the year	92,489,226	83,426,200
Contribution during the year	12,055,891	9,063,026
Accumulated contribution at the end of the year	<u>104,545,117</u>	<u>92,489,226</u>

30. Earnings per share

Basic earnings per share is calculated by dividing profit for the year (excluding other comprehensive income) by the weighted average number of ordinary shares in issue during the year, after adjusting the number of ordinary shares as a result of the increase in share capital arising from the issue of stock dividend.

On 20 April 2023, the 2023 Annual General Meeting of shareholders approved to pay a cash dividend of Baht 1.0 per share, and stock dividend of 1 million shares to the existing shareholders. For the purpose of calculating earnings per share, the Company adjusted the number of ordinary shares used to calculate the earnings per share, as though it had issued the stock dividend at the beginning of the reporting year.

	Financial statements in which the equity method is applied				Separate financial statements	
	2023	2022	2023	2022		
		(Restated)		(Restated)		
Number of ordinary shares issued						
during the year (shares)	37,000,000	36,000,000	37,000,000	36,000,000		
Number of stock dividend						
additional issue (shares) in 2023	-	1,000,000	-	1,000,000		
Total (shares)	<u>37,000,000</u>	<u>37,000,000</u>	<u>37,000,000</u>	<u>37,000,000</u>		
Profit for the period (Baht)	120,025,373	24,842,321	155,520,459	30,678,955		
Earnings per share (Baht per share)	3.24	0.67	4.20	0.83		

31. Dividends

Dividends declared during the years ended 31 December 2023 and 2022 consisted of the following:

	Approved by	Total dividends (Million Baht)	Dividends per share (Baht)
Annual dividends for 2022 (Cash dividends with the par value at 1.00 Baht per share and stock dividend at the rate of Baht 0.28 per share)	2023 Annual General Meeting No.91 on 20 April 2023	46.0	1.28
Annual dividends for 2021 (Cash dividends with the par value at 1.50 Baht per share and stock dividend at the rate of Baht 0.29 per share)	2022 Annual General Meeting No.90 on 26 April 2022	62.5	1.79

32. Commitments and contingent liabilities

32.1 Leases and service agreements commitments

As at 31 December 2023 and 2022, future minimum payments required under short-term leases, leases of low-value assets and service agreements were as follows.

	(Unit: Baht)	
	2023	2022
Payable within:		
Within 1 year	106,448	212,894
Over 1 to 3 years	-	106,448

32.2 Capital commitments

As at 31 December 2023, the Company had capital commitments of approximately Baht 1.8 million relating to building improvement, furniture, fixtures and equipment and amounting to Baht 14.3 million relating to computer software (2022: Baht 2.6 million and Baht 10.1 million, respectively).

32.3 Letter of Guarantees

As at 31 December 2023, there were bank guarantees amounting to Baht 2.2 million, and a certificate issued in the Company's name amounting to Baht 9.5 million, as required in the normal course of the Company's business (2022: Baht 2.1 million and Baht 7.1 million, respectively).

32.4 Litigation

As at 31 December 2023, the Company has been sued for damages totaling approximately Baht 55.4 million as insurer. The cases have not yet been finalised. However, the Company's obligations in respect of these lawsuits do not exceed the maximum sum insured per the relevant policies, which is Baht 34.9 million, and the Company has set aside reserves for contingent losses amounting to Baht 34.9 million in the financial statements (2022: Baht 69.1 million, Baht 38.9 million and Baht 38.9 million, respectively).

33. Related party transactions

33.1 Nature of relationship

In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

The relationships between the Company and its related parties are summarised below.

Name of related parties	Nature of relationship
TKI General Insurance Company Limited	Associated company
TKI Life Insurance Company Limited	Associated company
The United Indemnity Co., Ltd.	7.18% of shares held in the Company
Thanasarn Sombat (Thai) Company Limited	5.17% of shares held in the Company and common directors

Sittinan Co., Ltd.	A related person of the Company's director is a major shareholder
PIA Interior Co., Ltd.	A related person of the Company's director is a major shareholder

⁽¹⁾ Since January 2022, it is not a related party.

⁽²⁾ Since July 2023, it is not a related party.

33.2 Significant related party transactions

During the years ended 31 December 2023 and 2022, the Company had significant business transactions with related parties. Such transactions, which are summarised below, arose in the ordinary course of business and were concluded on commercial terms and bases agreed upon between the Company and those related parties.

(Unit: Baht)

	For the years ended		
	31 December		
	2023	2022	Pricing policy
Transactions with associated companies			
Reinsurance premium written	1,584,763	2,510,179	Ceded rates as specified based on the type of insurance and the reinsurance contracts
Claim expenses	20,861	43	Actual incurred
Commission paid to reinsurance	346,263	503,840	Ceded rates as specified based on the type of insurance and the reinsurance contracts
Transactions with related companies			
Direct premium written	74,174,027	79,740,018	Rates as specified in insurance contracts
Reinsurance premium written	2,776,240	13,301,913	Ceded rates as specified based on the type of insurance and the reinsurance contracts
Premium ceded	16,081,632	23,849,473	Ceded rates as specified based on the type of insurance and the reinsurance contracts
Claim expenses	10,711,994	19,539,182	Actual incurred
Commission paid to reinsurance	1,039,780	4,518,548	Ceded rates as specified based on the type of insurance and the reinsurance contracts
Commission received	7,453,125	9,516,809	Ceded rates as specified based on the type of insurance and the reinsurance contracts
Dividend income	21,218,160	23,240,940	As declared
Dividend paid	12,416,438	11,325,735	As declared
Rental and service fee for branch office expenses	240,020	240,135	Contract price
Rental income	172,973	172,973	Contract price

33.3 Outstanding balances

The balances of the accounts between the Company and those related companies as at December 2023 and 2022 are as follows:

31

	(Unit: Baht)	2023	2022
Reinsurance receivables - Amounts due from reinsurers			
The Falcon Insurance Plc.		-	14,604,716
TKI General Insurance Co., Ltd.		95,408	2,260,630

TKI General Insurance Co., Ltd.		76,025	596,743
Total		<u>76,025</u>	<u>21,633,928</u>

33.4 Directors and management's benefits

During the years ended 31 December 2023 and 2022, the Company had employment benefits expenses payable to their directors and management as below.

(Unit: Baht)

	For the years ended 31 December	
	2023	2022
Short-term benefits	51,319,360	55,532,230
Post-employment benefits	893,619	718,570
Total	<u>52,212,979</u>	<u>56,250,800</u>

34. Risk of insurance company

34.1 Insurance risk

Insurance risk refers to the risk resulting from fluctuations in the frequency, the severity and the timing of damage deviations from assumptions that are used to determine premium rates, calculation of reserves and underwriting. The insurance risk causes or is a factor that contributes to the following risks:

- a. Increase in the amount and frequency of loss

The impact of external factors, including physical or geographical factors, natural perils, disasters, accidents, terrorism and burglary may increase damage to lives, physical and property insured by the Company, leading to higher than expected losses. Such risks may result in the premiums received from customers being lower than the actual losses or the claims reserve being inadequate, which may have an impact on the Company's capital at risk.

- b. Suboptimal proportions of types of insurance products

The Company focuses on specific types of insurance products in order to expand its business and retain market share, which means that the Company's revenue and expenses are highly dependent on these insurance products. Some types of insurance have high loss ratio, and this in turn increases the Company's average cost of claims. As a result, the Company's risk with respect to revenue or profit, or its capital funds may be affected.

- c. Ethical or moral risk

This is the risk of dishonest actions being taken by insured persons for their personal gains, causing the Company payment of a higher settlement than a fair amount. This may result in a higher of loss ratio than expected and effect to the Company's liquidity risk.

The measures adopted by the Company in response to those above risks are as follows:

1. Analysis on the basis of loss ratio and combined ratio plus expenses incurred in accordance with the ratio specified by the Company.
2. Selection based on client group, nature of business and insurable risk, in accordance with specified criteria that correlate with acceptable risk levels, and analysis of the appropriate retention and ceded ratios to improve potential profitability.

3. Reinsurance to spread risk exposure by placing treaty and facultative reinsurance with local and overseas financial secured companies which have a credit rating of at least A-, and by purchasing excess of loss reinsurance that helps control retention risk to prevent exposure from the crisis, and to reduce the volatility of the Company's operations, financial position and capital level.
4. Management of the composition of the portfolio by writing all classes of insurance products and adjusting the portfolio mix according to market situation and customer demands. Technical knowledge and up to date statistics are used to plan marketing strategies to penetrate target markets by introducing products that are profitable and have high potential to expand.
5. Analysis of the concentration of insurance risk.

Concentration of insurance contracts liabilities segregated by insurance type are shown below.

	(Unit: Baht)					
	2023			2022		
	Gross premium	Outward premium	Net	Gross premium	Outward premium	Net
	reserves	reserves	Net	reserves	reserves	Net

6. Sensitivity analysis

Sensitivity analysis is performed to analyse the risk that insurance liabilities will increase or decrease as a result of changes in the assumptions used in the calculation of claim liabilities, which will impact the claims liabilities both before and after reinsurance. The risk may occur because the frequency or severity of losses, or loss adjustment expenses are not in line with expectations.

The Company performed analysis of the sensitivity of insurance liabilities to changes in key variables. The variables for which tests were performed were the ultimate loss ratio ("ULR") in the latest accident year and the unallocated loss adjustment expense ratio ("ULAE") for the best estimate of insurance liabilities, with selection of variables based on appropriateness and the possibility of occurrence.

The impact on the best estimate of insurance liabilities of changes in key variables is shown in the following table.

(Unit: Million Baht)					
2023					
	Assumption change	Increase (decrease) in provision for gross claim liabilities	Increase (decrease) in provision for net claim liabilities	Increase (decrease) in profit before tax	Increase (decrease) in owner's equity
Ultimate loss ratio in latest accident year	+ 5%	109	93	(93)	(74)
Ultimate loss ratio in latest accident year	- 5%	(109)	(93)	93	74
ULAE ratio	+50%	3.5	3.5	(3.5)	(2.8)
ULAE ratio	-50%	(3.5)	(3.5)	3.5	2.8

(Unit: Million Baht)					
2022					
	Assumption change	Increase (decrease) in provision for gross claim liabilities	Increase (decrease) in provision for net claim liabilities	Increase (decrease) in profit before tax	Increase (decrease) in owner's equity
Ultimate loss ratio in latest accident year	+ 5%	105	82	(82)	(66)
Ultimate loss ratio in latest accident year	- 5%	(104)	(81)	81	65
ULAE ratio	+ 50%	3.2	3.2	(3.2)	(2.5)
ULAE ratio	- 50%	(3.2)	(3.2)	3.2	2.5

34.2 Credit risk

Credit risk is the risk that the Company may suffer a financial loss as a result of a counterparty's inability to comply with the specified terms. The Company is exposed to credit risk primarily with respect to insurance and investments. The Company's maximum exposure to credit risk is limited to the book value less allowance for impairment as presented in the statement of financial position. The management manages the risk by adopting appropriate credit control policies and procedures, as follows:

a. Credit risk from underwriting

(1) Risk from reinsurers

The Company considers and selects only reinsurers with a credit rating of A- or higher and monthly monitors for any adjustments to the credit ratings of reinsurance companies.

(2) Risk from premium receivables collection

The Company possesses an efficient process of closely following up its outstanding premiums from the insured, agents and brokers, in addition to requiring agents and brokers to submit collateral for the specified credit limits allowed by the Company.

A credit impairment analysis of claims receivable from litigants is performed at each reporting date. The expected credit loss rates are based on actual claim statistics over the past 10 - 13 years, by classifying debtors into 2 types, namely insurance company litigants and non-insurance litigants. The calculation of expected credit loss reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions.

b. Credit risk from investments

The Company selects investments based on the credit ratings of the issuers of fixed income securities, assigned by reliable outside credit rating agencies such as TRIS and FITCH. It is the Company's policy to invest in fixed income securities of at least "Investment Grade" quality. All invested fixed income securities are periodically monitored for any adjustment in the debtors' credit rating and relevant information is gathered to review the business potential of the issuers. The Company also regularly monitors and reviews the limits set for investment to ensure adequate investment limits are maintained for individual lines at all times.

An impairment analysis of investments in debt instruments, cash deposits and accrued investment income is performed at each reporting date. The provision of expected credit loss is calculated by using the General Approach by classifying the investments into stages as follows:

- Stage 1 Investment grade debt instruments where there has no significant increase in credit risk. The Company recognises allowance for expected credit loss at an amount equal to the expected credit loss in the next 12 months.
- Stage 2 Debt instruments where there has significant increase in credit risk but that are not credit impaired such as a downgrade of credit rating. The Company recognises allowance for expected credit loss at an amount equal to the lifetime expected credit loss of the financial assets.
- Stage 3 When there is a significant indication of credit impairment, such as failure to fulfil a contract (overdue principal or interest), borrowers experiencing serious financial problems, the lender relaxing conditions for borrowers and the possibility of borrower bankruptcy, the Company recognises allowance for expected credit loss at an amount equal to the lifetime expected credit loss of the financial assets.

At every reporting date, the Company assesses whether there has been a significant increase in credit risk of financial assets since initial recognition. In the event of a significant change in credit risk, the debt instruments are restaged according to the indications or evidence of the assets being credit-impaired. The calculation of expected credit loss reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions.

The below table showed the maximum exposure to credit risk for financial assets before collateral or any activities that could mitigate credit risk. The maximum exposure to credit risk has carrying amounts that was presented the credit quality of financial assets exposed to credit risk as follows.

(Unit: Baht)

	2023				
	Financial assets where there has been a significant increase in credit risk (12-mth ECL)	Financial assets that are credit-impaired (Lifetime ECL - not credit impaired)	Financial assets that are credit-impaired (Lifetime ECL - credit impaired)	Financial assets where applied simplified approach to calculate ECL (Lifetime ECL - simplified approach)	Total

34.3 Market risk

Market risk is the risk that change in interest rates, foreign exchange rates and securities prices may have an effect on the Company's financial position. The Company had no significant financial instruments denominated in foreign currencies; market risk is therefore confined only to interest rate risk and equity position risk.

The Company manages market risk by diversifying its portfolio and spreading its investment funding to include various lines of investment as well as categories of business in order to minimise fluctuations in the aggregate value of its investments. It closely monitors and regularly assesses factors that may cause fluctuations in the value of investment instruments in order to make appropriate investment transactions in the circumstances. The Company has a policy not to invest in speculative securities that are highly exposed to price fluctuations but to focus on blue-chip securities and securities that generate steady yields. The Company has an investment committee who consider and set investment policies in addition to the Office of Insurance Commission's rules, in order to reduce exposure to investment loss, and also review the structure of the portfolio mix on a regular basis.

a. Interest rate risk

Interest rate risk is the risk that the value of assets or liabilities will fluctuate due to changes in market interest rates.

As at 31 December 2023 and 2022, significant assets and liabilities classified by type of interest rates, with those assets and liabilities that carry fixed interest rates further classified based on the maturity date, or the repricing date if this occurs before the maturity date as follows:

	2023						(Unit: Baht)
	Fixed interest rates			Floating interest rate	Non-interest bearing	Total	Effective interest rate (% per annum)
	Maturity date or repricing date	Within 1 year	1 - 5 years	5 years

Insurance liabilities							
Insurance contract liabilities - claim reserves and outstanding claims	-	-	-	-	1,028,891,92	1,028,891,92	-
Due to reinsurers	-	-	-	-	2	2	-
				-	665,223,974	665,223,974	-

Interest rate sensitivity

The following table demonstrates the sensitivity of the Company's equity to a reasonably possible change in interest rates which will effect to the fair value of debt instruments as at 31 December 2023.

	2023		2022	
	Increase (decrease)	Effect on equity (Million Baht)	Increase (decrease)	Effect on equity (Million Baht)
	(%)		(%)	
Available-for-sale investments -				
Debt instruments	1.0	(17.9)	1.0	(15.1)
Available-for-sale investments -				
Debt instruments	(1.0)	18.9	(1.0)	16.0

The above analysis has been prepared assuming that the amounts of debt instruments and all other variables remain constant. As a result, a change in interest rates affects fair value of investments in debt instruments.

b. Equity position risk

Equity position risk is the risk that change in the market prices of equity securities will result in fluctuations in revenues and in the value of assets.

As at 31 December 2023 and 2022, the Company has risk from its investments in securities of which the price will change with reference to market conditions.

34.4 Liquidity risk

Liquidity risk is the risk that the Company will be unable to liquidate its assets and/or procure sufficient funds to discharge its obligations in a timely manner, resulting in the occurrence of a financial loss.

The Company policies of management of liquidity risk are as follows:

- a. The Company invests in securities that are liquid, such as government sector securities or private sector securities with a low credit risk. It also spreads its investment funding and balances the portfolio, taking into account time horizons and fund needs to pay and meet obligations, management of accounts receivable and accounts payable, the period to maturity of assets and changes in the value of assets, given that, the maturity structure of assets and liabilities is in the appropriate level both volume and period, and correspond to external and internal circumstances surrounding the Company.

- b. Adequate shareholders' equity is maintained to cover liabilities and to manage exposure to business and operation risks. Other funding sources with high liquidity should also be secured as contingency plan.
- c. Responsibilities and lines of reporting to those who manage liquidity risk are clearly defined and a reporting system has been established to generate an early warning report for executives on transactions that do not conform to the Company's policy and to promptly, timely and accurately report warning signs of key risk indicators.

Counting from the financial position date, the periods to maturity of assets and liabilities held as at 31 December 2023 and 2022 are as follows:

	2023					(Unit: Baht)

Loans and interest receivables	686,989	-	-	686,989	686,989

The fair value hierarchy of financial assets as at 31 December 2023 and 2022 presents according to Note 4.20 to financial statements.

The method used for fair value measurement depends upon the characteristics of the financial instruments. The Company establishes the fair value of its financial instruments by adopting the following methods and assumptions.

- (a) Financial assets maturing in the short-term, which consist of cash and cash equivalents, deposit at financial institutions, accrued investment income and other assets, their fair value is estimated based on the carrying amount presented in the statements of financial position.
- (b) The fair value of investments in debt instruments is generally derived from quoted market prices or determined by using the yield curve as announced by the Thai Bond Market Association.
- (c) Investments in marketable equity instruments have been presented at fair value by using market price. Investments in non-listed equity instruments are determined using generally accepted pricing model or approximated to their net book values if the fair value cannot be reliably estimated.
- (d) Investments in marketable unit trusts have been presented at fair value by using market price. Investments in non-listed unit trusts are determined by using the net asset value as announced by asset management company.
- (e) The fair value of fixed rate loans is determined by discounting the expected future cash flows by using the current market interest rate.

During the current year, there were no transfers within the fair value hierarchy.

Reconciliation of recurring fair value measurements of financial assets, categorised within Level 3 of the fair value hierarchy, are as follows.

	(Unit: Baht)
	Financial statements in which the equity method is applied and Separate financial statements
Balance as of 1 January 2023	319,191,828
Net gain recognised into other comprehensive income	32,386,345
Less: Disposals during the year	(126,000,000)
Balance as of 31 December 2023	<u>225,578,173</u>

Key assumptions used to measure the fair value of investments, categorised within Level 3 that there has been a significant change in fair value are summarised below.

Financial instruments	Valuation technique	Significant unobservable inputs	Rates	Sensitivity of the input to fair value
<u>Investments in Insurance business</u>				
Non listed equity investments	Discounted future cashflow	Discount rate	9.50%	1% decrease in the discount rate would result in an increase in fair value by Baht 0.60 million and 1% increase in the discount rate would result in a decrease in fair value by Baht 0.53 million.
