**Environmental Policy**

The Navakij Insurance Public Company Limited (the "Company")'s main business is providing services which do not directly affect the environment. However, the Company realizes the importance of using resources efficiently for sustainability in the environmental dimension. Therefore, the environmental policy has been established as follows:

1. Commit to complying with laws, regulations and agreements with customers, business partners or stakeholders related to the environment.
2. Raise awareness and promote knowledge by communicating environmental policy to employees realize the importance and responsibility of environmental protection, both in terms of reducing and recycling.
3. Focus on using energy and resources economically with maximum efficiency to prevent and reduce negative environmental impacts resulting from the Company's activities, products and services.
4. Promote the use of energy and resources that are environmentally friendly, economical and cost-effective, including efficient waste management.
5. Improve work processes and methods, including changing equipment used in operations, to reduce problems or impacts from climate change and greenhouse gas emissions caused by energy and resource use.

The Company reviews the policy regularly at least once a year or when there is a significant change.
